1. COMPRESSION

Ultra-slim fit that enhances flexibility and athletic output.

COMPRESSION

3. REGULAR

Fitted but not nipped at the waist, this comfort-slim fit provides flexibility and mobility.

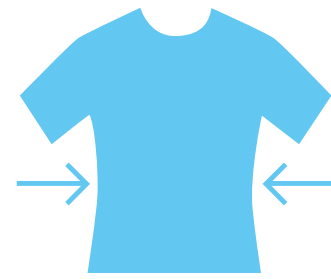

REGULAR

2. SEMI FITTED

Semi-slim and athletic cut nipped at the waist to ensure mobility and comfort.

SEMI FITTED

4. FITTED

Designed to contour the body without constrictions or compression.

FITTED

TECNOLOGY

DRY MX

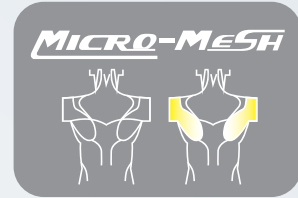

Several materials used by Padany to control body humidity, by allowing perspiration to the outer layer of the garment for faster and increased evaporation.

DRY MX helps the athlete to remain dry and comfortable during and after sports activities.

ELASTANO

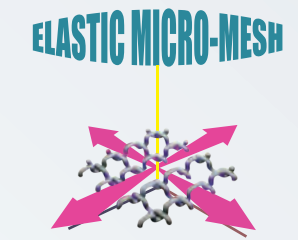

The elastane fibers are characterized by their great elasticity, allowing the garment to recover its original shape, without deformation. Fast-drying. It provides comfort and freedom of movement.

DRY MX is a unique fabric technology that keeps you dry and comfortable by drawing sweat away from the skin, reducing chills from perspiration whilst allowing air to circulate around the body. This allows the body stay dry and comfortable during high level sports performance and exercise.

MICRO MESH

Padany's Micro Mesh is a highly technical functional fabric that made exclusively from breathable fabrics. Perspiration and moisture is transported from the body out through the "honeycomb" style fibres of the fabric enabling the body to stay dry and comfortable during high level sports performance and exercise.

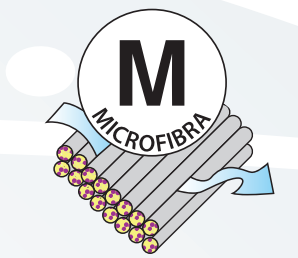

ELASTIC MICRO-MESH

PADANY fabric with elastane, applied to sports garments, its main characteristics being an elastic knit with a beehive effect, which provides maximum comfort, allowing the body to breathe, maintaining body temperature and expelling perspiration.

MICROFIBER

The material is manufactured using ultra fine micro fibres and micro threads which increases the comfort of the fit and gives the material a soft feeling, ideal for keeping the athlete cool, dry and comfortable.

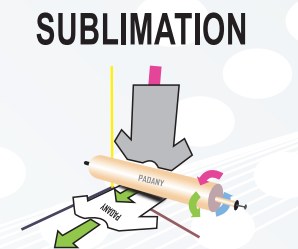

ELASTANO

PADANY weave

2 way stretch

COSTURA FLATLOCK

ANATOMICAL COMPRESSION

SUBLIMATION

Process consisting of printing a design or drawing, in full color, on paper and transferring same to the garment with 240°C heat and pressure. Textile sublimation allows obtaining the highest quality color images and a better touch than screen-printing or other printing methods. This system is ideal for fabrics containing a high percentage of synthetic fiber such as polyester, lycra, polyamide, acetate or microfiber.

BRAMA

Bio Elastic Compressive technical material giving you a "second skin". Flat seam construction prevents chafing and provides enhanced comfort. It is designed to give you complete freedom of movement and is built to provide you with long lasting performance and support. Moisture Management Brama maintains your body temperature by keeping you dry and comfortable during exercise. The Joma weave fabric keeps the body warm whilst allowing heat and energy draining perspiration to escape through rapid evaporation.

MATERIALS

DOBBY

Dobby is characterized by its fine-structured beehive effect.

FLEECE

Fleece materials are well-known for their heat insulation and lightness. They are soft to the touch and very resistant.

INTERLOCK

Interlock material offers a fine and compact surface. It is expandable, resistant and easy to care for.

JACQUARD

Jacquard materials are characterized by their knitted effect and their intricate designs.

KNITTED JERSEY

Knitted materials are comfortable, lightweight, expandable and flexible. Characterized by their soft touch and ribbing effect.

MESH

Material made of cross-fibers, lightweight, breathable and fast-drying.

OXFORD

Oxford is a very solid material, durable and resistant to friction as a result of its special manufacturing procedure.

PIQUÉ

Material characterized by its layered surface, rapidly transporting humidity toward the exterior. Lightweight and comfortable.

POPLIN

Poplin materials characterized by slightly transversal lines and for their shiny satin finish. A fine and dense structure.

TACTEL

Characterized by its soft surface, similar to cotton. Taffeta is a smooth and firm material. Solid and resistant.

TERRY

Material with curly structure, very comfortable and absorbent.

SERGE

Serge is lightweight with a very firm and fine weave.

KNIT

Knitted materials are characterized by their ribbed structure, tightly knit and expandable.

FIBER

COTTON

Natural fiber, characterized by its cooling effect and great comfort. Cotton is very absorbent and can evaporate 20% of its own weight in humidity without feeling humid to the touch.

ELASTANE

Synthetic fiber characterized by its high level of elasticity and durability. In North America it also known as Spandex. Lycra is a well-known trademark of elastane.

POLYAMIDE

Synthetic fiber with a high level of resistance against tearing and friction. Nylon, Cordura and Kevlar are well-known brands of polyamide fibers.

POLYESTER

Synthetic fiber, especially resistant to the wrinkles and tearing. Polyester hardly absorbs humidity and rises rapidly.
